# ABOUT

## WHAT IS META CLUB TOKEN ?

## WHAT WE OFFER TO YOU ?

With the META CLUB project, we offer you the opportunity to meet other people without leaving the comfort of your home, to do activities with them and to earn both fun and money while doing them. In this Club, you can play competitive games with your virtual or real friends, attend concerts or stand-up shows and dance like crazy in our virtual disco. Are you ready for a new sense of entertainment?

## WHAT'S THE REAL UTILITY ?

Our main goal is to provide a social and fun experience to people who are used to spending time at home during the pandemic. While doing this, to ensure that they both earn money and take action. In addition to providing this with a truly magnificent virtual club experience, we aim to be one of the pioneers of this process with our vr compatible treadmills in the future.

# WHAT IS METAVERSE ?

The metaverse is a concept of a persistent, online, 3D universe that combines multiple different virtual spaces. You can think of it as a future iteration of the internet. The metaverse will allow users to work, meet, game, and socialize together in these 3D spaces. The metaverse isn't fully in existence, but some platforms contain metaverse-like elements. Video games currently provide the closest metaverse experience on offer. Developers have pushed the boundaries of what a game is through hosting in-game events and creating virtual economies.

Although not required, cryptocurrencies can be a great fit for a metaverse. They allow for creating a digital economy with different types of utility tokens and virtual collectibles (NFTs). The metaverse would also benefit from the use of crypto wallets, such as Trust Wallet and MetaMask. Also, blockchain technology can provide transparent and reliable governance systems.

Blockchain, metaverse-like applications already exist and provide people with liveable incomes. Axie Infinity is one play-to-earn game that many users play to support their income. SecondLive and Decentraland are other examples of successfully mixing the blockchain world and virtual reality apps.

When we look to the future, big tech giants are trying to lead the way. However, the decentralized aspects of the blockchain industry is letting smaller players participate in the metaverse's development as well.

# TOKENOMICS

Our tokenomics system is focused on reducing the total supply in a planned way and also to sustain strong source of marketing. However, creating a solid liquidity is among the main objectives of the system.

# TOKENOMICS

## HAVE A LOOK ON HOW IT WORKS

### TOTAL SUPPLY - 1 BILLION

1 billion tokens are created in total

### MARKETING - % 5

5% of these will be automatically converted to bnb by the contract in each purchase and sale and transferred to the marketing wallet. These bnbs can be used both for marketing and to slow down the price decline of the chart by making buy-backs if necessary.

### LIQUIDTY - % 5

5% of each trade will be automatically transferred to the liquidity pool

### DEVELOPMENT - % 2

2% of each purchase and sale will be automatically converted into bnb by the contract as developer share and transferred to the developer wallet. In this way, there will be no sales requirement for the developer. This provides a better rise in the long run.

# BURNING PLAN

## SUPPLIES WILL BE LIMITED DUE TO THE SMART BURNING PLAN

We will burn twice as many tokens as the previous week for 8 weeks. And this amount will be 35% ( 350 millions token ) of the total supply. It can be reviewed below how many tokens will be burned each week.

- 1. *Week* - 1.367.187
- 2. *Week* - 2.734.375
- 3. *Week* - 5.468.750
- 4. *Week* - 10.937.500
- 5. *Week* - 21.875.000
- 6. *Week* - 43.750.000
- 7. *Week* - 87.500.000
- 8. *Week* - 175.000.000
